9.4. VNXLU that You transfer to the Platform are kept in the collective customers' VNXLU wallet, which is an on-chain omnibus (collective) wallet opened on the Ethereum blockchain on a non-segregated basis but separately from the Company's own funds. VNXLU (if any) can be withdrawn at Your request only via interface of the Platform in an automated manner.

9.5. VNX Commodities hereby confirms that the Digital Assets do not constitute assets on VNX Commodities' balance sheet and that the Digital Assets can be identified at any time in the Platform database. You remain the owner of the Digital Assets, but You can no longer dispose of the Digital Assets other than through the Platform interface. If You want to dispose of the Digital Assets You shall submit an instruction through the Platform interface as set out in section 5 hereof. VNX Commodities reserves the right to block the instruction if there are compelling reasons to do so (such as suspected fraud or violation of mandatory regulations).

9.6. You hereby expressly acknowledge Your understanding and consent that You are not entitled to the "TT key" (as defined in the TVTG) in relation to the Digital Assets You transfer to the Platform. Such TT Keys are stored in an encrypted form in the Platform. Operations with Digital Assets transferred to the Platform are possible only via the Platform interface. VNX Commodities does not have access to the TT Keys to the Digital Assets.

9.7. By acceptance of the Terms You expressly and irrevocably appoint and authorize VNX Commodities to be: (a) Your "TT Token Depositary" and "TT Key Depositary" (as in each case defined in the TVTG) and safeguard Digital Assets as well as private blockchain keys (TT Keys) for such Digital Assets in Your name in case they are transferred to the wallet controlled by VNX Commodities in accordance with the Terms or under the applicable law (e.g. according to the court order).

10. TRANSFERS OF THE COMMODITY TOKENS

10.1. The Token Holder may freely transfer a Commodity Token on the blockchain, either to another Platform wallet or to a wallet supporting the relevant blockchain off the Platform.

10.2. The rights and obligations as stated in the Terms are inseparably linked to the ownership of the Commodity Token and are equally transferred, together with the ownership rights in the Commodity from one Token Holder to another together with every transfer of the Commodity Token. The Terms are therefore binding on all Token Holders who acquire the Commodity Token. However, VNX Commodities does not guarantee the effective representation and transfer of the rights represented by the Commodity Token against a third party.

10.3. The Token Holder, who has the right of disposal over the Commodity Token, is the only lawful owner of the respective Commodity (subject to the transfer of title according to 10.4), no other person may claim sale, collection or delivery of the Commodity or otherwise transact with VNX Commodities with respect to the Commodity.

10.4. Due to the fact the Commodity Tokens have been created in Liechtenstein, the TVTG is applicable to the transfer of title on the Commodity, which is represented by the Commodity Token, as follows:

10.4.1. The transfer of title of the Commodity Token requires the transfer of the right of disposal ("*Verfügungsberechtigung*") of the Commodity Token by transferring the Commodity Token from the trusted technologies identifier of the seller to that of the buyer.

10.4.2. Simultaneously, the seller and the buyer agree to transfer the ownership of the Commodity and at the same time agree that the seller transfers his independent indirect possession (*mittelbaren Besitz*) to the buyer, which the buyer accepts (*Verfügungsgeschäft*). Therefore, VNX Commodities holds the transferred Commodity after the transfer to the buyer acting as the agent in possession (“*Besitzmittler*”). The seller shall inform VNX Commodities accordingly.

10.5. Simultaneously, this transfer of the Commodity Tokens from one wallet to another and of the ownership of the Commodity will be entered in the Commodity Entitlements Register.

10.6. No consent of VNX Commodities is required for the Commodity Token transfers. However, the Token Holder must notify and disclose to VNX Commodities details of the recipient (email and name) in case of the Commodity Token transfer, such new recipient (if not known to VNX Commodities) will receive email notification from VNX Commodities with the invitation to register a user account on the Platform. If the Token Holder fails to notify VNX Commodities details of new recipient and new recipient of the Commodity Token fails to open a user account on the Platform and comply with eligibility requirements as stipulated in section 1 “*Eligibility to use the Platform*”, VNX Commodities as custodian won’t be able to update the information on the Commodity/Commodity Token owner and at the same time such new Token Holder won’t be able to submit the Commodity sale, collection or delivery requests through the Platform or use other Services of VNX Commodities.

10.7. Any new Token Holder will be able to interact with VNX Commodities/the Platform, according to the Terms, subject to:

10.7.1. opening a user account on the Platform and complying with eligibility requirements as stipulated in section 1 “*Eligibility to use the Platform*”;

10.7.2. transferring the Commodity Token to the Platform personal wallet.

Only in this case VNX Commodities will be able to update information on the Token Holder unless it is contrary to applicable law or would otherwise expose us to legal liability.

10.8. VNX Commodities will assume no liability whatsoever to the new Token Holder unless: (a) it was provided with reliable and sufficient data on new Token Holder pursuant to section 10.6 above; and (b) the new Token Holder registers/opens user account on the Platform.

11. COMMODITY ENTITLEMENTS REGISTER

11.1. Due to the legal nature of the Commodity Token, namely, its representation of ownership in an individualized asset, VNX Commodities will maintain a register of Commodity entitlements that correspond to specific wallets (the “***Commodity Entitlements Register***”).

11.2. Any data and/or information submitted to VNX Commodities for or in relation to the Commodity Entitlement Register by You will be processed by VNX on an “as is” basis. VNX Commodities will not review such data or information as to whether it is true, accurate, not misleading, authentic and up-to-date. In submitting data and/or information, You confirm and represent to VNX Commodities that the provided data/information is true, accurate, not misleading, authentic and up-to-date, and You agree to regularly update the provided information (if necessary). VNX Commodities shall not be liable or responsible for the submitted data and/or information.

11.3. The Commodity Entitlements Register reflects the ownership of the Commodity. The ownership of the Commodity will be transferred according to section 10.4.

11.4. The Token Holders may get access to information from the Commodity Entitlements Register either from their user account on the Platform (if the Commodity Tokens are held on the Platform wallet) or on the website: www.vnx.li by

inserting unique address of the relevant Token Holders' wallet. In case of co-ownership of the specific piece of the Commodity the Commodity Entitlements Register will reflect the relevant proportionate ownership in that piece.

12. HOURS OF OPERATIONS

- 12.1. Transactions with the Commodities on the Platform, including purchase requests, sale request, collection or delivery requests as well as funds' conversion operations may be performed within working hours of VNX Commodities, Commodities dealers, financial institutions, the Vaults and other partners (the "***Operation Hours***"). Operation Hours may be found on our official website. During non-Operation Hours certain functions of the Platform may be disabled.

- 13.3. You may also instruct VNX Commodities to procure conversion of VNX Credit into cryptocurrencies and vice versa and/or to procure conversion of cryptocurrencies into fiat currencies to perform payments for the Commodities and/or for VNX Commodities' fees.
- 13.4. Unless, Commodity dealers agree to accept cryptocurrencies, for purposes of the Commodities purchase transactions, the payments will need to be processed in fiat currencies (EUR, etc.), crypto funds will have to be converted into fiat currency prior to payment for the Commodity. Therefore, if You transfer crypto funds to the Platform and subsequently submit Commodity purchase request, you automatically instruct VNX Commodities to procure conversion of the relevant amount of Your crypto funds into fiat currency to be used for the Commodity purchase. Your instruction will be fulfilled in the following manner:
 - 13.4.1. the exchange will be made in an automated manner via external crypto-conversion services' provider;
 - 13.4.2. You will be required to confirm the proposed exchange rate that will be shown in Your user account on the Platform for Your exchange operation.
 - 13.4.3. upon Your confirmation of the exchange operation, the received fiat funds will be used to purchase the Commodity in accordance with Your Commodity purchase request. The Platform does not allow any other usage of such funds.

Same procedure applies to conversion of fiat Commodity sale proceeds into crypto funds.

- 13.5. If you have unpaid fees or other indebtedness to us, we reserve the right to set off the full amount of Your indebtedness or part thereof from Your funds held with VNX Commodities in any currency (fiat and/or crypto) and VNXLU's (if any).

14. MANDATORY COMMODITY TOKEN CANCELLATION

Upon receipt of a court judgement or other enforcement order issued by an authorized law enforcement body in relation to a Token Holder, VNX Commodities will be under obligation to execute it. Depending on instructions of the law enforcement body and technical abilities of the relevant blockchain on which the relevant VNX Stablecoin was issued, enforcement may be in the form of blocking the relevant Commodity Tokens, transfer of the Commodity Tokens to the on-the-Platform custodial wallet

controlled by VNX Commodities, cancellation of the Commodity Tokens or sale of the underlying Commodity and transfer of the sale proceeds as directed by the law enforcement body, etc.

15. FEES

- 15.1. Please refer to our fee schedule in Annex II of the Terms for current fee information. This fee schedule is subject to change at any time. Any changes in the fee schedule as well as the effective date will be notified to You via the Platform. If You do not agree with the amended fee schedule, You shall immediately inform VNX Commodities of Your refusal to accept the Terms with amended fee schedule by sending the relevant message to support@vnx.li and simultaneously request to sell Your Commodities or Your Commodity Tokens (if there are potential purchasers), withdraw Your funds and close Your user account on the Platform. Your use of the Services after publication of the amended fee schedule of the Terms without sending the notice of refusal will be deemed as Your acceptance of the amended fee schedule of the Terms.
- 15.2. The specification of VNX Commodity's fees (if any) will also be available on the Platform each time You perform operations with us.
- 15.3. Commodity Tokens are generated on the blockchain protocol and any transfer of the Commodity Tokens involves blockchain transaction fees (such as gas for Ethereum) that are deducted from the transfer amount and are charged by blockchain network. These fees do not relate to the fees payable to VNX Commodities.
- 15.4. If You hold VNXLU on the Platform, You can use them for payment of the relevant VNX Commodities' fees hereunder. Value of one VNXLU for this purpose shall be equal to its market value as shown on the Platform but in any event no less than EUR 0.25 per one VNXLU.

16. RANKING AND COLLATERALIZATION

- 16.1. In case of insolvency of VNX Commodities, the Token Holders' Commodity represented by the Commodity Tokens and held, administered and stored by VNX Commodities in its function as administrator and custodian does not form part of the bankrupt's estate. VNX Commodities may however, in case of insolvency, no longer be able to dispose of the Token Holders' Commodity but Token Holders may be requested to raise their claims for delivery of their Commodity against the trustee in bankruptcy.
- 16.2. The Collective Token Holders Commodity Deposit does not form part of the assets of VNX Commodities and the Collective Token Holders Commodity Deposit as well as ownership rights in the Commodity in such Collective Token Holders Commodity Deposit do therefore remain intact irrelevant of an eventual liquidation, dissolution or insolvency of VNX Commodities in its capacity as custodian of the Collective Token Holders Commodity Deposit.

In case of liquidation, dissolution or insolvency of VNX Commodities, unless otherwise was agreed upon between the Parties, VNX Commodities is authorized and obliged to appoint a successor for the management and custody of the Collective Token Holders Commodity Deposit which successor will be bound by the Terms.

Risk of changes in regulatory requirements

One should anticipate that blockchain and related services, specifically financial services, will become substantially more regulated in the future. This may make it necessary for VNX Commodities to adapt its business model accordingly. As a result, it cannot be excluded that VNX Commodities may no longer be able to provide certain services or to provide them in the manner described in the Terms. Also, additional costs may arise due to the necessity to adapt VNX Commodities' business model and operations.

It cannot be excluded that VNX Commodities may need additional regulatory licenses for the implementation or further operation of its business model. This may delay or jeopardize the implementation of the business model of VNX Commodities, may require extensive adjustments or may even make it impossible for VNX Commodities to further pursue its business model.

Partnership risks

Implementation of VNX Commodities' business model requires stable partnerships and cooperation with precious metal traders as well as with precious metal storage and delivery service providers. There is a risk that VNX Commodities may not be able to establish or maintain such partnerships and business relations or may lose other relevant business partners. This may result in VNX Commodities being unable to, for example, generate further Commodity Tokens or procure their listing on crypto exchanges, which may negatively impact VNX Commodities' business.

VNX Commodities, the Platform are subject to cyber security and data loss risks or other security breaches

VNX Commodities' business involves storage and transmission of users' proprietary information, and security breaches could cause a risk of loss or misuse of this information, and to resulting claims, fines and litigation.

VNX Commodities and the Platform may be subjected to a variety of cyber-attacks, which may occur from time to time. Cyber-attacks may target VNX Commodities and/or the Platform, customers, suppliers, banks, e-commerce in general or the communication infrastructure. An attack or a breach of security could result in a loss of private data, unauthorized trades, an interruption of trading for an extended period of time, violation of applicable privacy and other laws, significant legal and financial exposure, damage to reputation, and a loss of confidence in security measures, any of which could have a material adverse effect on VNX Commodities financial results and business. Any such attack or breach could adversely affect the ability of VNX Commodities and the Platform to operate. Any breach of data security that exposes or compromises the security of any private digital keys used to authorize or validate transaction orders, or that enables any unauthorized person to generate any of the private digital keys, could result in an unauthorized trades and would have a material adverse effect on VNX Commodities and Token Holders. Because trades utilizing blockchain technology settle on the trade date, it could be impossible to correct unauthorized trades.

Furthermore, attackers can manipulate the cryptocurrency market. The price of cryptocurrencies, such as BTC and ETH, are set by several exchanges. If an exchange is attacked such that it is taken offline, traders can take advantage of price differences. Additionally, attackers can target platforms that buy and sell cryptocurrencies and digital wallets that hold cryptocurrencies. It is possible that such an attack could adversely affect the value of the Token Holders' digital wallets.

Risk of Insolvency

In case of insolvency of VNX Commodities, the Token Holders' Commodity represented by the Commodity Tokens and held, administered and stored by VNX Commodities in its function as administrator and custodian, does not form part of the bankrupt's estate. Pursuant to the Terms, in case of liquidation, dissolution or insolvency of VNX Commodities, unless otherwise was agreed upon between the Parties, it is authorized and obliged to appoint a successor for the management and custody of the Collective Token Holders Commodity Deposit which successor will be bound by the Terms. However, there is a risk that such successor won't be appointed. Thus, the Token Holders may be requested to raise their claims for delivery of their Commodity against the trustee in bankruptcy.

RISKS RELATED TO THE COMMODITY TOKEN

General risk in relation to the Commodity Token

It's Your decision whether or not the purchase of Commodity is suitable for You. In particular You should:

- ✓ have sufficient knowledge and experience to comprehensively assess the Commodity and the benefits and risks of investing in it;
- ✓ have sufficient financial resources and liquidity to bear all risks associated with the purchase;
- ✓ fully understand the Terms and be aware of trends and the development of relevant indicators of the Commodity market; and
- ✓ be able, on Your own or with the assistance of a professional, to evaluate possible scenarios of economic trends, interest rates and other factors that may affect the investment in the Commodity and Your ability to bear potential risks;
- ✓ it is furthermore recommended that You have in-depth knowledge and experience of the functionality of blockchains, smart contracts and cryptographic tokens in general or acquire them prior to purchasing the Commodity Token.

You bear the risk that an investment in the Commodity may not be appropriate for You.

Trading and liquidity risk

As of the date of the Terms the Commodity Tokens are not admitted to trading on a regulated or unregulated market but can be transferred on a bilateral basis (over the counter - OTC).

There is no guarantee that a secondary market for such bilateral trades of the Commodity Token will develop and will be and remain liquid. You may therefore not be able to sell the Commodity Token or not within a certain time frame, at a reasonable price or at a price that is at least equal to the capital invested.

Software Risks

Smart contract systems, decentralized cloud and distributed ledger technology generally used by VNX Commodities as well as the related software, technology and technical concepts and theories (including blockchain, cryptography, etc.) are in an ongoing development process and are therefore subject to significant operational and technological risks. There is no guarantee that the processes for acquiring, selling, receiving, using and holding the Commodity Tokens and for receiving payments, e.g. in case of the sale of the Commodity Token, will function without interruption or error. There is a risk that software and other technologies and may have weaknesses, vulnerabilities, bugs or other errors. In the worst case, this can lead to the irretrievable loss of the Commodity Token.

VNX Commodities assumes no liability and makes no warranties or representations with respect to the functionality of smart contracts programmed, used or applied in relation to the Commodity Tokens in the widest sense.

Risk of loss of access data

It is Your sole responsibility to safely store Your access data to Your user account on the Platform and/or wallets including the wallet(s) where the Commodity Tokens are stored. If access data is lost or stolen, You irretrievably lose all access to the Commodity Tokens and assets deposited at the address in question. Upon Your request VNX Commodities can only issue new access code (password) to Your user account on the Platform. Other than that VNX Commodities can neither restore, "reset" or reissue access codes or “reset” Commodity Token or issue new ones.

Legal risks

The legal classification of crypto currencies and tokens as well as their admissibility, effectiveness and enforceability of contracts concluded in this context can vary from jurisdiction to jurisdiction. It cannot be ruled out that in individual countries, including Your country of residence, transactions in connection with tokens are prohibited or will be prohibited in the future or that corresponding contracts and legal transactions are not legally enforceable.

Regulatory Risks

The Commodity Token as well as blockchain technologies and business models in general are of innovative nature. It cannot be ruled out that legal provisions, in particular provisions on the regulation of financial services, may be applied to the Commodity Token or VNX Commodities' business operations in individual jurisdictions or that new regulatory developments may generally apply to the transactions in question. This may lead to conflicts and problems in connection with automated processes based on smart contracts or with smart contract systems in general and decentralized "cloud" and distributed ledger concepts. As a result, it may become necessary, among other things, for VNX Commodities' business activities to be substantially adapted or even discontinued.

Risk of theft or loss

Smart contract systems and other technological components for or in connection with the issuance of tokens may be subject to hacking attacks which may result in the theft or loss of tokens already assigned to customers.

Compliance risks

VNX Commodities is subject to Liechtenstein Due Diligence Law and regular supervision to combat money laundering, organized crime, and terrorist financing by state authorities. Persons who fail to pass the respective know your customer (KYC) and anti-money laundering (AML) procedures of VNX Commodities are not eligible to use the Platform and the Services of VNX Commodities. Please note that if You purchase the Commodity Token outside the Platform Your access to the Services of VNX Commodities is conditional upon satisfactory results of You KYC/AML/CTF checks. In other words, if You fail to pass KYC/AML/CTF checks You would not be able get access to the Services and get use of the Commodity Token which You acquired outside the Platform.

ADDITIONAL RISKS SPECIFIC TO THE COMMODITY

Risk of incomplete return of the invested amounts

VNX Commodities is obliged upon receipt of the relevant request of the Token Holder (e.g. Commodity sale request or Commodity delivery request) to procure sale of the relevant amount of the Commodity and transfer the sale proceeds (less fees) to the Token Holder or to procure delivery of the Commodity to the Token Holder.

You bear the risk that the value of the Commodity at the time of sale/delivery (i.e. Your exit from the investment) will be less than its market value at the time of Your Commodity purchase (i.e. Your entry into the investment).

Physical Delivery of Commodity

Under the Terms We may establish minimum or maximum quantity of Commodity that maybe requested to be sold or delivered. If such minimum quantity is established herein then only Token Holders who hold the relevant amount of the Commodity Tokens individually or jointly with other Token Holders may submit Commodity sale or delivery request. If certain Token Holder does not hold the relevant amount of Commodity Tokens corresponding to the minimum quantity of Commodity that may be requested for sale or delivery then such Token Holder may either acquire the missing amount of the Commodity Tokens from other Token Holders wishing to sell or at his/her own expense ask VNX Commodities to exchange a piece of the Commodity into several smaller pieces, if possible, and subject to VNX Commodities' consent and then, deduct applicable expenses and procure their sale or delivery to the Token Holder.

Example: Type of Commodity – gold. The minimum amount of gold that may be requested to be sold or delivered is 1 kg which is equal to 1,000 VNX Gold Commodity Tokens (“**VNX Gold/VNXAU**”). If a Token Holder holds 900 VNX Gold he/she may purchase the missing 100 VNX Gold from other Token Holders wishing to sell (if any). If he/she purchases the missing 100 VNX Gold he/she can request VNX Commodities to procure sale or delivery of 1 kg gold bar to him/her after deduction of applicable fees and costs. If there are no Token Holders wishing to sell 100 VNX Gold, then such Token Holder may ask VNX Commodities to procure exchange of the 1 kg gold bar to 10 gold bars 100g each at the expense of such Token Holder. If that is doable at a reasonable cost and VNX Commodities agrees to do it, then upon completion of the exchange such Token Holder may submit gold sale request or gold delivery request (as applicable) for the delivery of the relevant quantity of gold bars of 100g each less applicable fees and expenses.

Personal collection of physical gold

If the Token Holder wishes to submit Commodity delivery request, such Token Holder may choose to either personally collect the Commodity or to have it delivered to an address notified to VNX Commodities.

Personal collection is only possible after coordination with VNX Commodities (support@vnx.li) who in turn will coordinate with the relevant precious metal storage service provider where the Commodity is stored.

Transport risk, transport costs

If the Token Holder submits Commodity delivery request Commodity will be delivered to the location specified by the Token Holder at his/her own expense and risk.

In case of delivery a “handling fee” may apply, please refer to the fee schedule.

VNX Commodities assumes no liability for the transportation of the physical Commodity. Any and all risks (such as loss, damage, destruction, theft etc.) pass onto the Token Holder as soon as the Commodity leaves the high-security warehouse and is handed over to the relevant transportation/delivery service provider.

It is the Token Holder's obligation to ensure smooth and compliant import of the Commodity into the country indicated as the cargo destination. The Token Holders therefore bear the risk that the Commodity cannot be delivered or that only a part of the Commodity can be delivered to the location requested by the Token Holder.

Risk of theft or loss

Each Commodity Token represents ownership in a certain quantity of Commodity, which is held and managed by VNX Commodities in a Collective Commodity Deposit for and on behalf of the Token Holders. The Collective Commodity Deposit is stored at a high-security facility so that losses due to theft, fire, natural disasters etc. are not likely but cannot totally be excluded. Risks of theft or loss are to be borne by the Token Holders directly in their capacity as owners of the Commodity.

There are further risks of theft or loss during delivery or transportation of the Commodity from the high-security facility to the address indicated by the Token Holder for delivery of the Commodity. Costs and risks of such transportation and delivery are on the Token Holders.
